

2012 Maternal & Child Health Block Grant Report

The Maternal and Child Health Services Block Grant (Title V of the Social Security Act) is the only federal program devoted to improving the health of all women, children and families. Title V provides funding to state maternal and child health (MCH) programs, which serve 35 million women and children in the U.S.

Since 1935, federal funds have supported state activities that improve the health of pregnant women, children, adolescents, and children and youth with special health needs (commonly called the "MCH population"). In Hawaii, the funds are used primarily to address maternal and child health infrastructure building services including:

- Surveillance and data about the health status of Hawaii's MCH population;
- Assessment and monitoring of needs to assure health and wellness;
- State and local collaboration to assure access to preventive health services and information; and
- Linkages to health care and other maternal and child health services in the community.

The Hawaii Department of Health Family Health Services Division (FHSD) is responsible for the administration of the federal MCH Block Grant funds.

State Annual Title V Report/Application

Every year the Hawaii Department of Health submits a report and application for federal MCH Block Grant funds. The MCH Block Grant provides more than \$2 million to the State to address MCH needs and priorities. The report/application includes data on 18 national and 7-10 state performance measures as well as 21 health indicators, a budget summary, and a report on past, present, and planned activities. Every five years, the report/application also includes a comprehensive needs assessment along with a set of priorities for the next five years.

2012 Block Grant Annual Report and Application

[Narrative](#) (PDF)

The narrative includes: a needs assessment update, the state overview, and descriptions of activities related to the national and state performance measures and key health status indicators.

[Data Forms](#) (PDF)

The data forms include budget summaries, health status indicators, and national and state performance measure data.

Public Comments

The public is invited to comment on the Department's draft FY 2013 application, FY 2011 report for the MCH Block Grant. All comments received will be recorded and will receive serious consideration during the final review process. Comments received after the report is finalized will be incorporated into next year's report/application.

Comments may be submitted to:
